

SCHÜTTE AQUADOT

A digital tap with
Smart Control

YOUR BENEFITS

VARIABLE FLOW RATE FOR MEETING EVERY NEED

At the touch of a button, you can adjust the water volume in three steps to suit your needs. A double blink indicates that you have reached the minimum or maximum flow rate.

Use this to regulate water that is already running or to start the cold water flow directly with a low or high flow rate.

PRECISE TEMPERATURE CONTROL AT THE TOUCH OF A BUTTON

Choose from five different levels, from cold to hot water. The coloured ring lights up depending on the set water temperature and provides a visual highlight.

The intuitive controls allow you to adjust the temperature of the flowing water instantly.

EFFICIENT OUTPUT OF SELECTED QUANTITY OF WATER

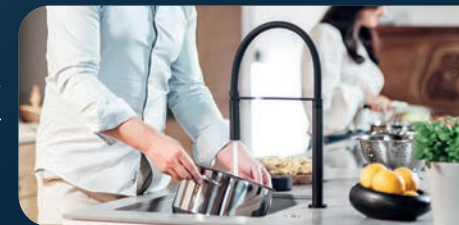

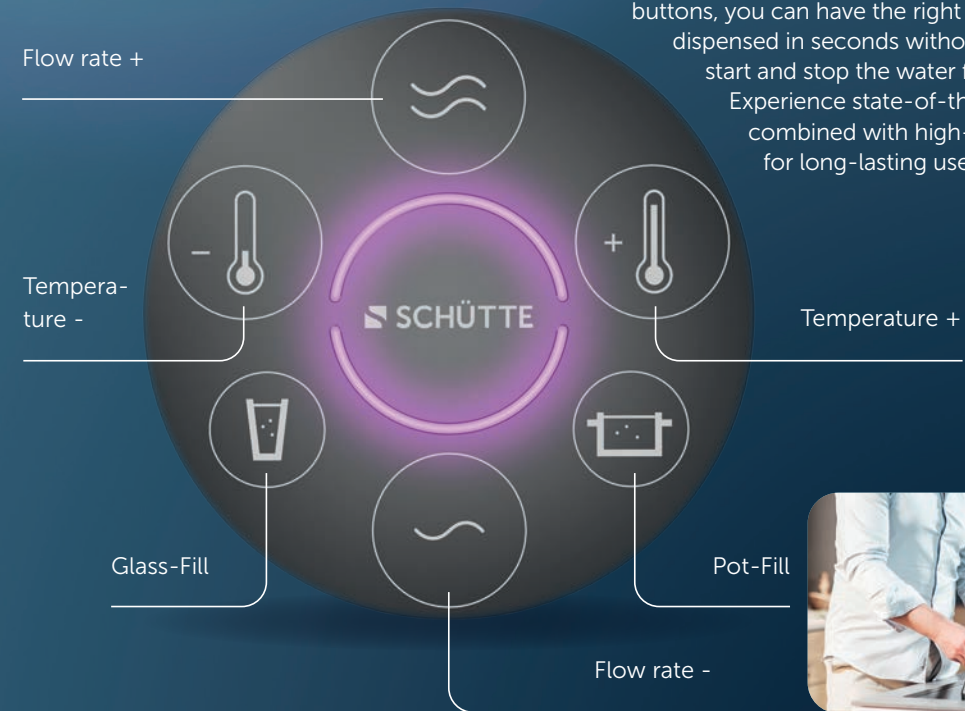

This function makes filling jars child's play. A preset amount of water is dispensed by simply tapping the glass or pot fill button. Simply press and hold the button until the desired amount of water is reached for customised programming. This exact amount of water will be dispensed the next time you start the appliance. No wasted water, no overflowing! – You can simply devote yourself to other activities.

AQUADOT

The kitchen mixer that can do more – innovative technology, convenience, efficiency and style make this mixer an absolute highlight in your kitchen.

No matter where, the **DOT** is always within reach – it is the digital control for the tap. With the quick selection buttons, you can have the right amount of water dispensed in seconds without having to start and stop the water flow manually.

Experience state-of-the-art technology combined with high-quality materials for long-lasting use in your kitchen.

THE TAP

The **AQUADOT** is not only a technical marvel, but also a design highlight. Perfectly proportioned both visually and haptically, its rounded, linear design blends seamlessly into a wide variety of kitchen styles.

The water jet can be precisely steered using the flexible soft-touch hose, whether you are washing dishes or filling pots.

The feel of the hose ensures comfortable handling and the matt finish makes it easy to clean and robust.

The diverter on the water outlet makes it easy to switch between the pearl and shower jets.

THE COLORS

The **AQUADOT**, a mixer tap and Dot, is available in the trendy colours stainless steel look/black and matt black.
